FREE BROWSING ON ALL MOBILE PHONE USING CAST OPERA MINI 5.2

I will categorise nokia phones into two.

1. SYMBIAN

2. JAVA

If you are using nokia phone such as NOKIA E-Series, N-series, BB5 NOKIA ,3230,6630,6600,etc they are all regarded as symbian nokia phones,

While java nokia phones

are 3110c, 6230,6230c,2700 etc

all these are lower version of nokia phones and are regarded as JAVA NOKIA PHONES.

How to configure your simbian phones

Download cast opera 5.2

Here is the download link

http://xchanger.mobi/get235545/otenntfefH/opera5.2_beta_multi_readvance_cast_cheat.jar

OR

You can Google it as follows

Cast opera 5.2

Google Search

I'm Feeling Lucky

copy it and paste it in your phone if your downloading it from a computer or download it from your phone directly.

After installing the opera mini in your symbian phone open the opera mini,

Then this is the configuration

on custom http server, put or write: <http://64.255.164.21> Or <http://64.255.180.192> OR <http://64.255.164.20/21> OR <http://64.255.164.20>

Scroll down to where you will see host, then write:

[www.mtnonline .com](http://www.mtnonline.com)

i.e. all for the configuration of symbian phones just click ok and wait for it to load and start browsing

use the mtn default access point,

you can send (settings to 3888) to get the default mtn settings if you formatted your phone or if you don't have it. NOTE: the above settings don't just work for only symbian nokia u can also use it for any other mobile phone like Sony Ericson etc.

CONFIGURING JAVA PHONES

For you to configure your java phones for free browsing, Download the cast

opera 5.2 , Here is the download link

http://xchanger.mobi/get235545/otenntfefH/opera5.2_beta_multi_readvance_cast_cheat.jar

Paste in your phone.

You also need mtn prov file which is for java phones, Here is the download link for the mtn prov file

http://myprov.co.cc/download/id_188374/download

NOTE: you can also create the prov file yourself visit www.myprov.co.cc

Also copy and paste the prov file in your phone.

NOTE: you will make the mtn prov file you transferred in your phone to default, to make it default,

1. From your phone click on menu

2. Click on settings

3. Click on configuration

4. Select default configuration settings

5. Choose the mtn prov file
 6. Click on option
 6. Select default
- That's all.

CONFIGURATION OF THE OPERA MINI ON JAVA PHONES:

Open the cast opera mini and use these settings

On custom http server, put or write: : <http://64.255.164.21> Or <http://64.255.180.192> OR

<http://64.255.164.20/21> OR <http://64.255.164.20>

Scroll down to where you will see host, then write:

[www.mtnonline .com](http://www.mtnonline.com)

I.e. all for the configuration of java phones just click ok and wait for it to load and start browsing
HAPPY BROWSING.
