Copyright You can distribute this report to your family, friends and your subscribers/list for free.

Disclaimer/legal Notice There's no guarantee that this method will work for you even if it will. I won't be held liable for any consequences due to your actions. We only provide information products to assist you in achieving your goals; the author does not accept any responsibilities for any liabilities resulting from the use of this information. While every attempt has been made to verify the information given here, the author, his resellers and his affiliates cannot assume any responsibilities for errors, inaccuracies or omission. Before you go ahead to open and verify your paypal account, I have a little offer for you which I know you can't and will not refuse. Do you have a US bank account? Do you know you can open a US bank account without filling any forms, without SSN, tax ID or any documents? Do you know you can have a functional US bank account with Meta Bank, USA in 2mins from now? I bet you didn't. I've written a 5page guide for you to follow and get your bank account in 2mins or less. It's a fully functional checking account, with routing number & a free debit mastercard to go along with it, with your name fully embossed on it. You can link it with your paypal, Adsense, 2checkout, Amazon, Clickbank for seamless and stress-free withdrawals right here in Nigeria.

I want each and everybody reading this report to have it, so I've decided to let it go for a ridiculously low price of **N2000**.

If after 5mins, your bank account is not ready, call me and say "obinna, you are a big liar, refund my money"

I opened mine in 2mins flat. For ordering instructions and more details see the end of this report.

Now let's go ahead and get a Paypal account...

For entrepreneurial & general internet business talk and discussion or for any help or issue, join the aggressive marketers at www.aocelle.blogspot.com

List Of Things You Need

1. Liberty Reserve Account (free)
2. Fund with \$10 at www.e-naira.com
3. Open a new gmail or yahoo mail address (free)
4. Virtual Visa Card at www.virtual-cc.com for \$7.50 with your (LR) A/C
5. Non-European address & phone number. I make use of India.
6. Non-Nigerian IP address, I use an Indian IP always to access my paypal since I opened it with an Indian address. I'll show you how to get one at the end of this report

Now let's take them one step at a time.

Step One

Go to <http://www.libertyreserve.com/?ref=U4155776> to open a free account if you don't have one, follow all the instructions there and make sure you keep all your login details on a notepad or your phone so that you won't forget them when you need to access your account. Keep them safe and private.

Step Two

Now that your liberty reserve account is ready, it's time to fund it. So depending on the amount of paypal account you want to verify. If you just want to verify your account, you can just fund with \$10 which is the minimum at www.enaira.com. Go over to their website to get more details including their bank details and phone numbers. There are lots of other ones you can make use of, like www.epaymonster.com and co. Use whichever one you prefer.

Calculate the amount you're willing to fund and pay the Naira equivalent into their account. As soon as you do, contact them immediately by filling their form on their website, your account shouldn't take more than 3hours to get credited. As soon as your account is credited they will notify you by sms, you can as well be checking your liberty reserve a/c if any new fund has been entered. If after 3hours your a/c isn't credited, please contact them on phone.

Step Three

Go to www.virtual-cc.com to get a virtual credit card that you'll use for the paypal verification. Here's how their site looks like:

For entrepreneurial & general internet business talk and discussion or for any help or issue, join the aggressive marketers at www.aocelle.blogspot.com

To place your order, click on the paypal virtual cc logo as instructed, and it will take you to this page as shown diagrammatically below.

[illegible]

To place an order, click on the paypal virtual cc logo as instructed, and it will take you to this page below

1. Types and quantities of VCC

Qty.	Item	Regular price
<input type="text" value="2"/>	VCC for PayPal verification (non-european account) <i>PayPal will credit your account with \$1.95 after using the VCC.</i>	\$7.50
<input type="text" value="0"/>	VCC for PayPal verification (european account) <i>PayPal will credit your account with €1.50 after using the VCC.</i>	\$8.00
<input type="text" value="0"/>	VCC for eBay account verification	\$6.00

Email address

Applicable for PayPal VCC only: Please indicate the country you will choose or have chosen for the PayPal account(s) you intend to verify with our VCC

~~Our VCC may not work on countries that are not listed in the dropdown list above. We may refuse to offer support and/or refund if you use a VCC on a PayPal account associated to a country that is not listed in the list.~~

The picture above is quite explanatory. As you can see they offer 3 types of credit cards. One is Vcc for Paypal verification (non-european account), this is what we are going to be using all the time. The second option there is Vcc for paypal verification (European account), this is for those using european address for registering with paypal and we are not going to be using that. The third one there is Vcc for ebay account verification, that's for people who want to verify their ebay accounts, that's not what we are here for.

The first picture is where you enter the amount of credit card you want to purchase, if it's just one paypal account you intend to verify, then simply enter one in the box, if it's two, then enter two. However note that each card costs \$7.50 and it always a non-european account which is the first option on the screen. The second marked picture is where you enter your email address, that's exactly where they'll send your VCC to, so you can enter your real and primary email address. Don't worry they won't spam you, just your VCC details, that's all. The third big marked box is where you choose the IP address for the country you're registering with. As you can see I've selected India because that's the country I always register with. Now when paypal checks the IP of the VCC, it will

correspond with your details. So please don't forget that option anytime you're ordering.

As soon as you're done, just click on the last picture that says "proceed".

As soon as it processes, click on the Liberty Reserve checkout button on the right hand side of the page and follow the instructions to pay with your Liberty Reserve account.

Please note that there's an option on Liberty Reserve that says make payment private, please don't check that option as they'll deduct \$0.75 from your account. As soon as your payment is successful, click on the "Return to merchant" button.

Now you'll wait for them to process and send your VCC to the mail you used when ordering. It takes like 30 mins to 1 hr for them to send it. Please note that this card has to be used with your PayPal account within 24 hours or it won't work, and nobody will refund any money back to you. So please take note, don't order if you're not yet ready to use them.

While you're waiting, let's do some other things.

Step Four

Remember I told you we're going to need a non-European address that PayPal accepts to register with PayPal. And I recommend India, that's what I use and I greatly recommend it. Do you know anybody in India that you can make use of his/her address? Well if no, follow these steps to get yourself an Indian address and phone number. Note there's a free method to do this and paid one as well. If you have the extra cash to spare, you can opt for the paid one. But it's quite expensive and I don't recommend it since you want to make money and not spend the little you have. I use the free method and it works great, but just in case you want the paid method, just head over to <http://www.servcorp.co.in/>

For entrepreneurial & general internet business talk and discussion or for any help or issue, join the aggressive marketers at www.aocelle.blogspot.com

Here is the free method: just head over to www.google.com and type in “India Yellow Page”, a bunch of links will pop out; follow each of them to get addresses and phone numbers of different businesses and industries in India which you can register with.

Here’s a sample Indian address:

*Address: 112, Sunny Palace, Narayanaguda Pin
code: 500029 City: Hyderabad State: Andhra
Pradesh Telephone: 91-40-7634607*

If you’re going to be using the above address, make sure you change the address from “112” to other numbers since there are going to be lots of people reading this manual like you or better still google search for yours as I explained above.

Now that we have an address to use, let’s move to Step five...

Step Five....

We are going to register with paypal.com now. Paypal will detect if you register or access your account with a Nigerian IP or any other country’s IP that they don’t accept. So what do we do in this case? We opt for proxy servers and VPN. Check the end of this report for detailed information on how to change your IP to an Indian IP.

Now let’s go ahead to register with paypal using our details. Make sure your virtual credit card has been sent cos you’re going to need it here. So head over to www.paypal.com and click on the sign up link, select your country which is India and select the “premier” account. This type of account allows you to do everything with paypal. Fill in the details as shown. Fill in your credit card details which include the number, date of expiry and the CVV2 which is the security code.

For entrepreneurial & general internet business talk and discussion or for any help or issue, join the aggressive marketers at www.aocelle.blogspot.com

The image shows a screenshot of the PayPal registration form. The form includes fields for Address Line 1, Address Line 2 (optional), City, State / Province / Region, Postal Code, and Phone number. Below these fields is a checkbox labeled "Link my credit card so I can start shopping right away (recommended)". This checkbox is checked. Below the checkbox are fields for Card Number, Expiration date (Month and Year), and CSC (What's this?). The Card Number, Expiration date, and CSC fields are highlighted with red circles. At the bottom of the form, there is a button labeled "Agree and Create Account".

Address Line 1
Address Line 2 (optional)
City
State / Province / Region Postal Code
Phone number [Why is this needed?](#)
☒ Link my credit card so I can start shopping right away (recommended)
Card Number
Expiration date -Month- -Year- CSC [What's this?](#)
By clicking the button below, I agree to the PayPal [User Agreement](#) and [Privacy Policy](#).
[Agree and Create Account](#)

If the credit card information didn't show, don't worry, just go ahead and fill in the other details, and fill in the credit card when you're ready to verify below:

Now go back to your paypal main account and click on the "get verified" link, that will take you to a page, follow the instructions on that page, there's nothing much, just click on the "link and confirm credit card" or whatever it is it says.

Now take a deep breath and relax, we are almost done.

Step Six...

Now paypal must have sent a verification link to the email address you used in registering, you need to confirm that before we continue, so kindly log in and click on the confirmation link paypal sent to get your paypal account activated. Please note that you must be on proxy while doing all these things otherwise paypal will detect and limit your account.

For entrepreneurial & general internet business talk and discussion or for any help or issue, join the aggressive marketers at www.aocelle.blogspot.com

Step Seven...

Now go back to www.virtual-cc.com to request for your EXPUSE number. An EXPUSE number is a 4 digit paypal verification which they sent to www.virtualcc.com, so all you have to do is go back to www.virtual-cc.com to request for it. Just type in your credit card number and email address in the boxes provided and click on the “send request”. Keep checking your mail regularly, they’ll send a notification to you as soon as that EXPUSE number is ready, shouldn’t take more than 30mins. As soon as you get that notification from them that it’s ready, simply go back to their site www.virtual-cc.com to type in your credit card number and email address in the boxes. Your EXPUSE number will be displayed for you. It’s just a 4 digit number. Now move to step eight.

Step Eight...

Go back to paypal and click on the get verified link again, simply enter your 4 digit EXPUSE number and your account will be verified sharp sharp.

There is a way to successfully run your paypal account from Nigeria with your Nigerian IP address. Just write paypal informing them you’re moving to Nigeria for work related issues and that you need to access your paypal account whilst you are there. They will write you back asking you to provide a specific IP address which you’ll be using to access your account. As soon as they approve your request you’ll be using the specific IP whenever you want to access your account.

However there’s no guarantee that the above method may work for you even if it has worked for so many people. I won’t be held liable for any consequences due to your action.

For entrepreneurial & general internet business talk and discussion or for any help or issue, join the aggressive marketers at www.aocelle.blogspot.com

How To Get A Non-Nigerian IP Address If you log in with an IP address that is not related with the country address you registered with, paypal will definitely know and shut you down. So if you registered your paypal account with an Indian address, use an Indian IP always to access your account, same goes with any other country you want to register with. Since we're using an Indian address, let's go ahead to get an Indian IP address, even if the country you're making use of is not India, just follow this example, it's pretty similar.

Go to <http://www.hidemyass.com/proxy-list/> , select the country you're using from the drop down list box and click on go. Here's a sample of mine:

Free Web Proxy List Table

Sort By: India (62) Fastest First ☐ Hide PlanetLab Proxies? Go

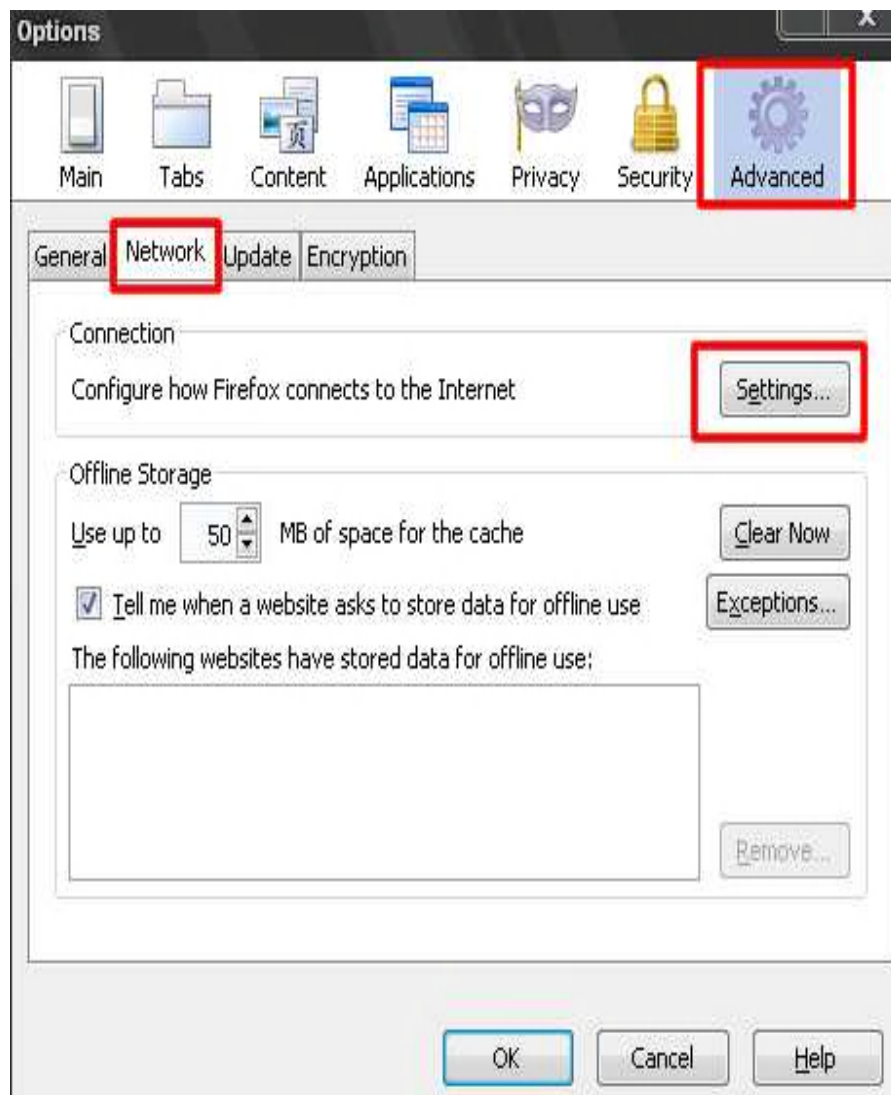

IP Address	Port	Country	Speed *	Last Tested / Added
121.243.34.24	80	India	<div><div></div></div>	2009-09-25 02:42:42
121.243.34.24	8080	India	<div><div></div></div>	2009-09-25 02:42:43
121.242.41.18	3128	India	<div><div></div></div>	2009-09-25 02:42:44
202.54.61.99	8080	India	<div><div></div></div>	2009-09-25 02:42:43
122.160.145.74	8000	India	<div><div></div></div>	2009-09-25 02:42:44

121.242.41.72	3128	India	<div><div></div></div>	2009-09-25 02:42:43
210.211.148.46	8080	India	<div><div></div></div>	2009-09-25 02:42:42
122.169.248.156	8080	India	<div><div></div></div>	2009-09-25 02:42:44
219.64.175.139	80	India	<div><div></div></div>	2009-09-25 02:42:42
210.212.88.39	3128	India	<div><div></div></div>	2009-09-25 02:42:42

As you can there are lots of IP addresses to choose from, the first one is fastest, so let's go ahead and try it out or whichever one you want to use.

Now we're going to configure it to work with Mozilla Firefox, though the instructions to do this is already listed on their website but let me help you out with screenshots.

Open your Mozilla Firefox browser.

Click on **Tools**, click on **Options**. Select the **Advanced** tab, select the **Network** tab and click on **Settings**. As shown below

Now enter the IP and port number you got from: <http://www.hidemyass.com/proxy-list/> exactly as shown. I believe the picture below is self-explanatory:
For entrepreneurial & general internet business talk and discussion or for any help or issue, join the aggressive marketers at www.aocelle.blogspot.com

Connection Settings

Configure Proxies to Access the Internet

☐ No proxy

☐ Auto-detect proxy settings for this network

☒ Manual proxy configuration:

HTTP Proxy: 121.243.34.24 Port: 8080

☒ Use this proxy server for all protocols

SSL Proxy: 121.243.34.24 Port: 8080

FTP Proxy: 121.243.34.24 Port: 8080

Gopher Proxy: 121.243.34.24 Port: 8080

SOCKS Host: 121.243.34.24 Port: 8080

☐ SOCKS v4 ☒ SOCKS v5

No Proxy for: localhost, 127.0.0.1
Example: .mozilla.org, .net.nz, 192.168.1.0/24

☐ Automatic proxy configuration URL:

What you should know is that using this configuration slows down your internet speed a little bit. So as soon as you're through with your Paypal, just go back and select **No proxy** to continue enjoying your fast browsing. If it's time to work with your paypal again, you simply go back and select the **Manual proxy configuration**, as simple as that.

Please also note that the above method may not work if you're already using a proxy or software to connect like the so-called free browsing. You have to be on a paying connection and not proxy before it can work.

I always use www.dnsstuff.com or www.your-freedom.de to test and see my IP address. Go ahead and try it. It'll be displayed at the top left corner of their website.

For entrepreneurial & general internet business talk and discussion or for any help or issue, join the aggressive marketers www.aocelle.blogspot.com

US Bank Account In 5mins Or Less

Now that you've successfully opened and verified your paypal account, you're also going to need a US bank account. Don't worry there are no forms to fill, you don't need SSN or any documents side from your name and address where they'll ship your debit mastercard to for easy withdrawal from Nigeria. Opening an account has never been easier, all you need is just 2mins or less and your account details plus your account number and routing number are ready for you to start using immediately. You can use this account for Paypal, Google Adsense, Clickbank and other affiliate pay. It's a must you add a US bank account to your paypal for a stress free operation.

Just for you to know how simple it is, it's just a mere 5page report. And it goes for **N2000** only. I'm doing this so everybody who needs one can afford it.

A recent customer bought one of my products and replied and I quote "Why do you always charge low for your products? You write so well and your products deliver as expected, but yet you charge pennies for it. You're the only marketer I see doing this. Thanks though." Those were his exact words in his email.

To order for yours now simply make a deposit of **N2000** to the following a/c: Bank: **GTBank** A/C: **53151501191590** Name: **aliogor obinna**

As soon as you're done just forward your payment details to bbaliogor@yahoo.com, that's the only way to get a faster response. As soon as the bank posts your payment, I'll forward it to your mail. This shouldn't take more than 3-8hrs.

Did I mention that no money will be spent in opening your US bank account? It's totally free of charge to open your account. Your debit Mastercard will be sent in 10days with your Full name fully embossed on it.

Happy banking in the US!

Send me a testimonial so I can publish it to the "doubting Thomases out there"
